

Socializer Messenger

Encrypted Chats

How to start a chat and send messages using Socializer Messenger's encryption features

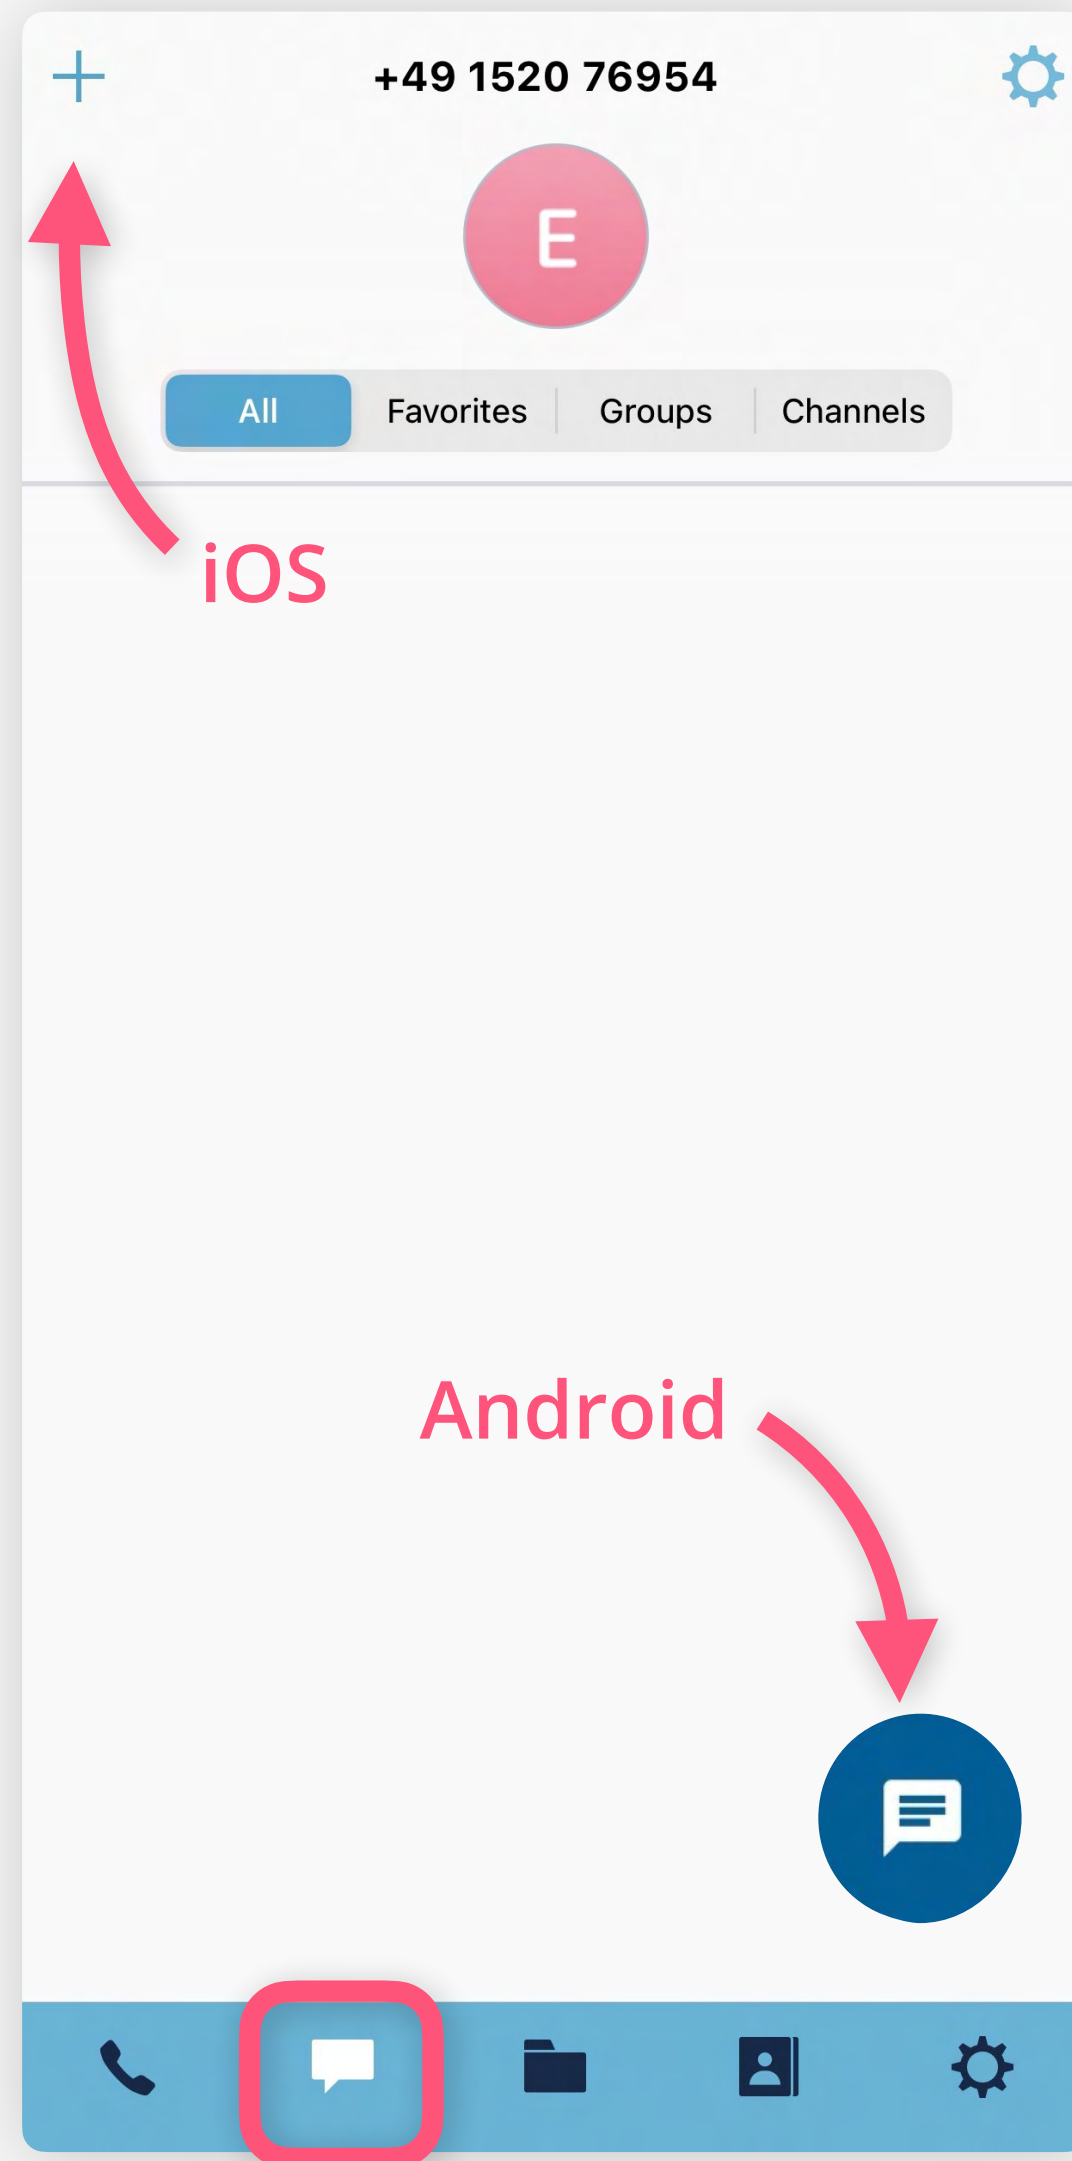

Good to know:

We currently provide iOS guides only, because our iOS and Android clients are working **mostly identical**.

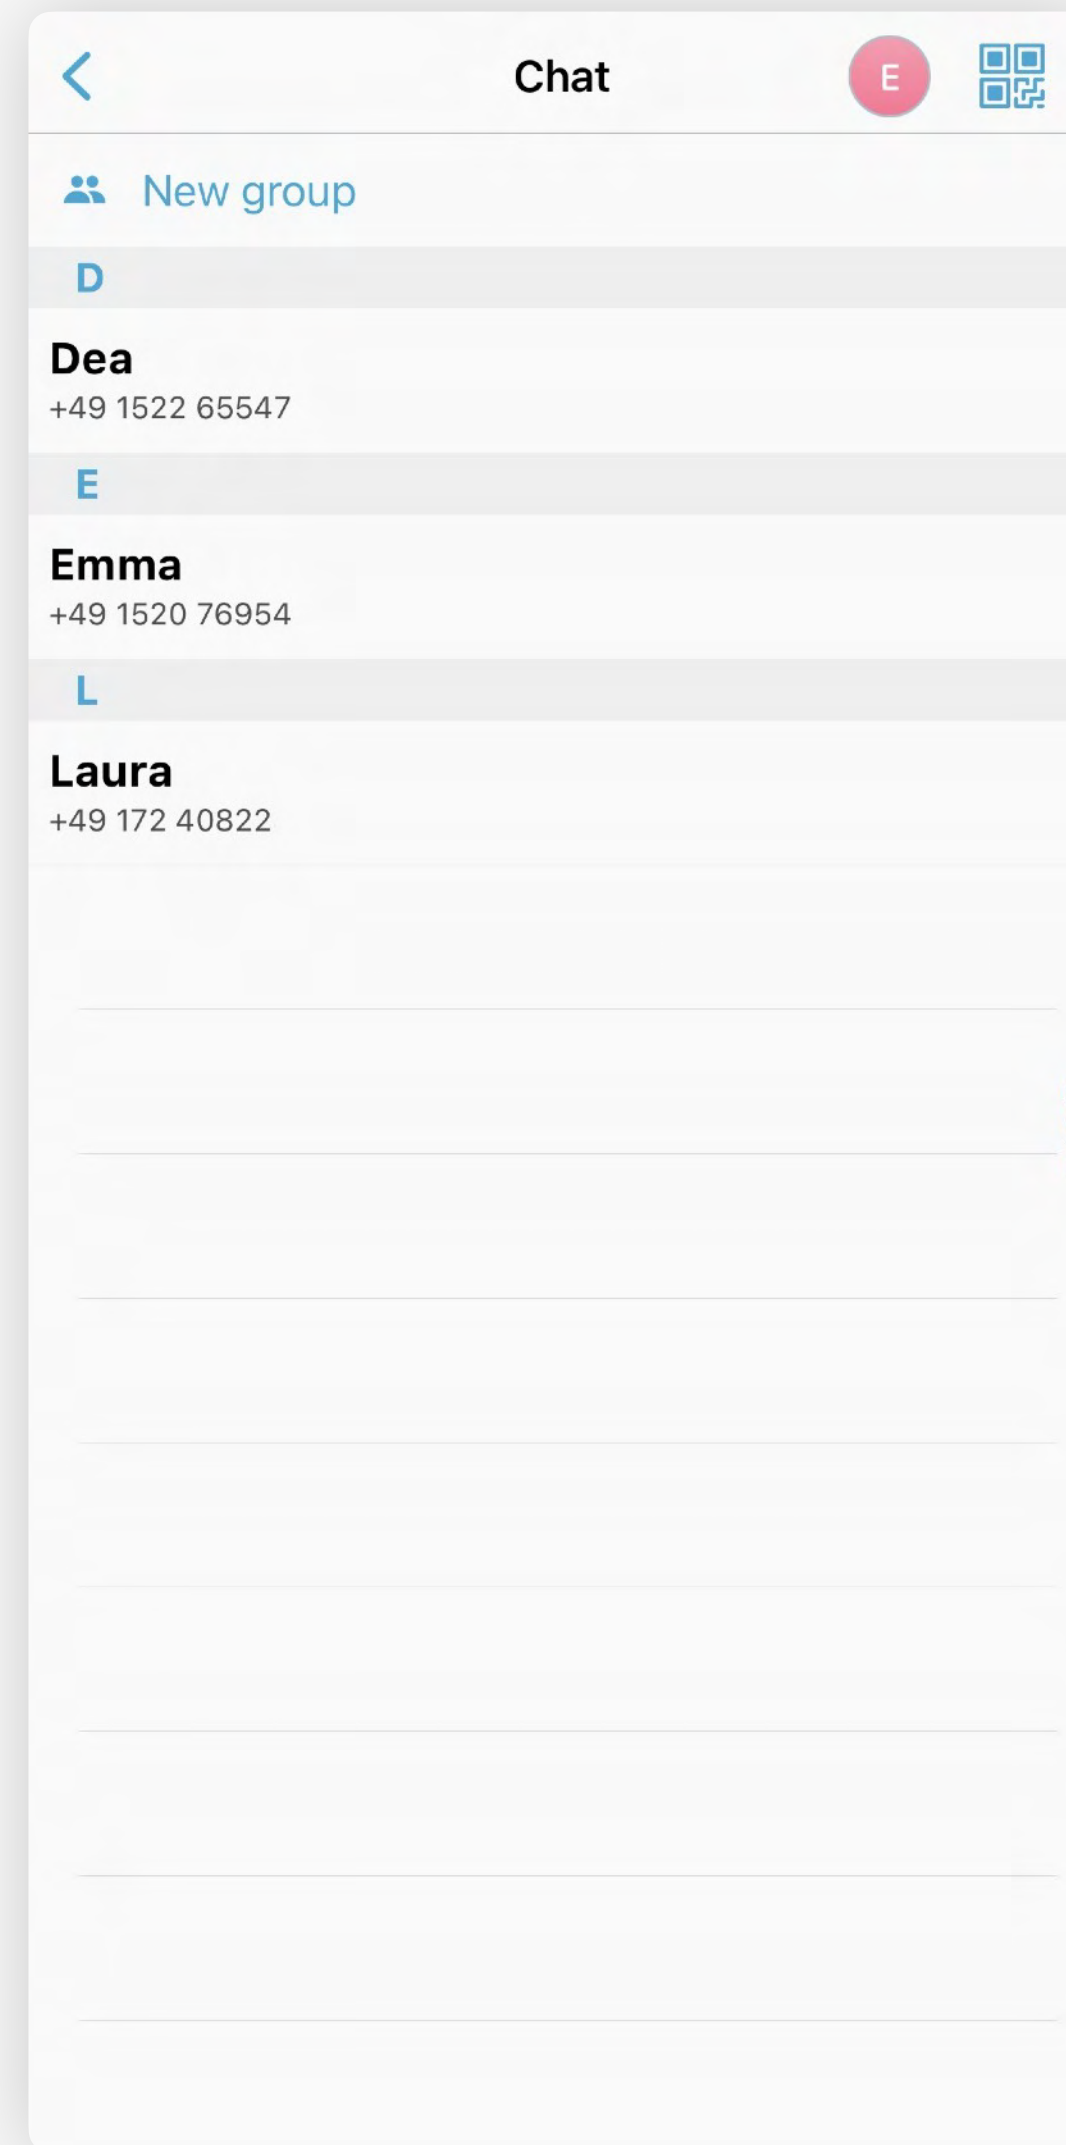

[Click here to](#)

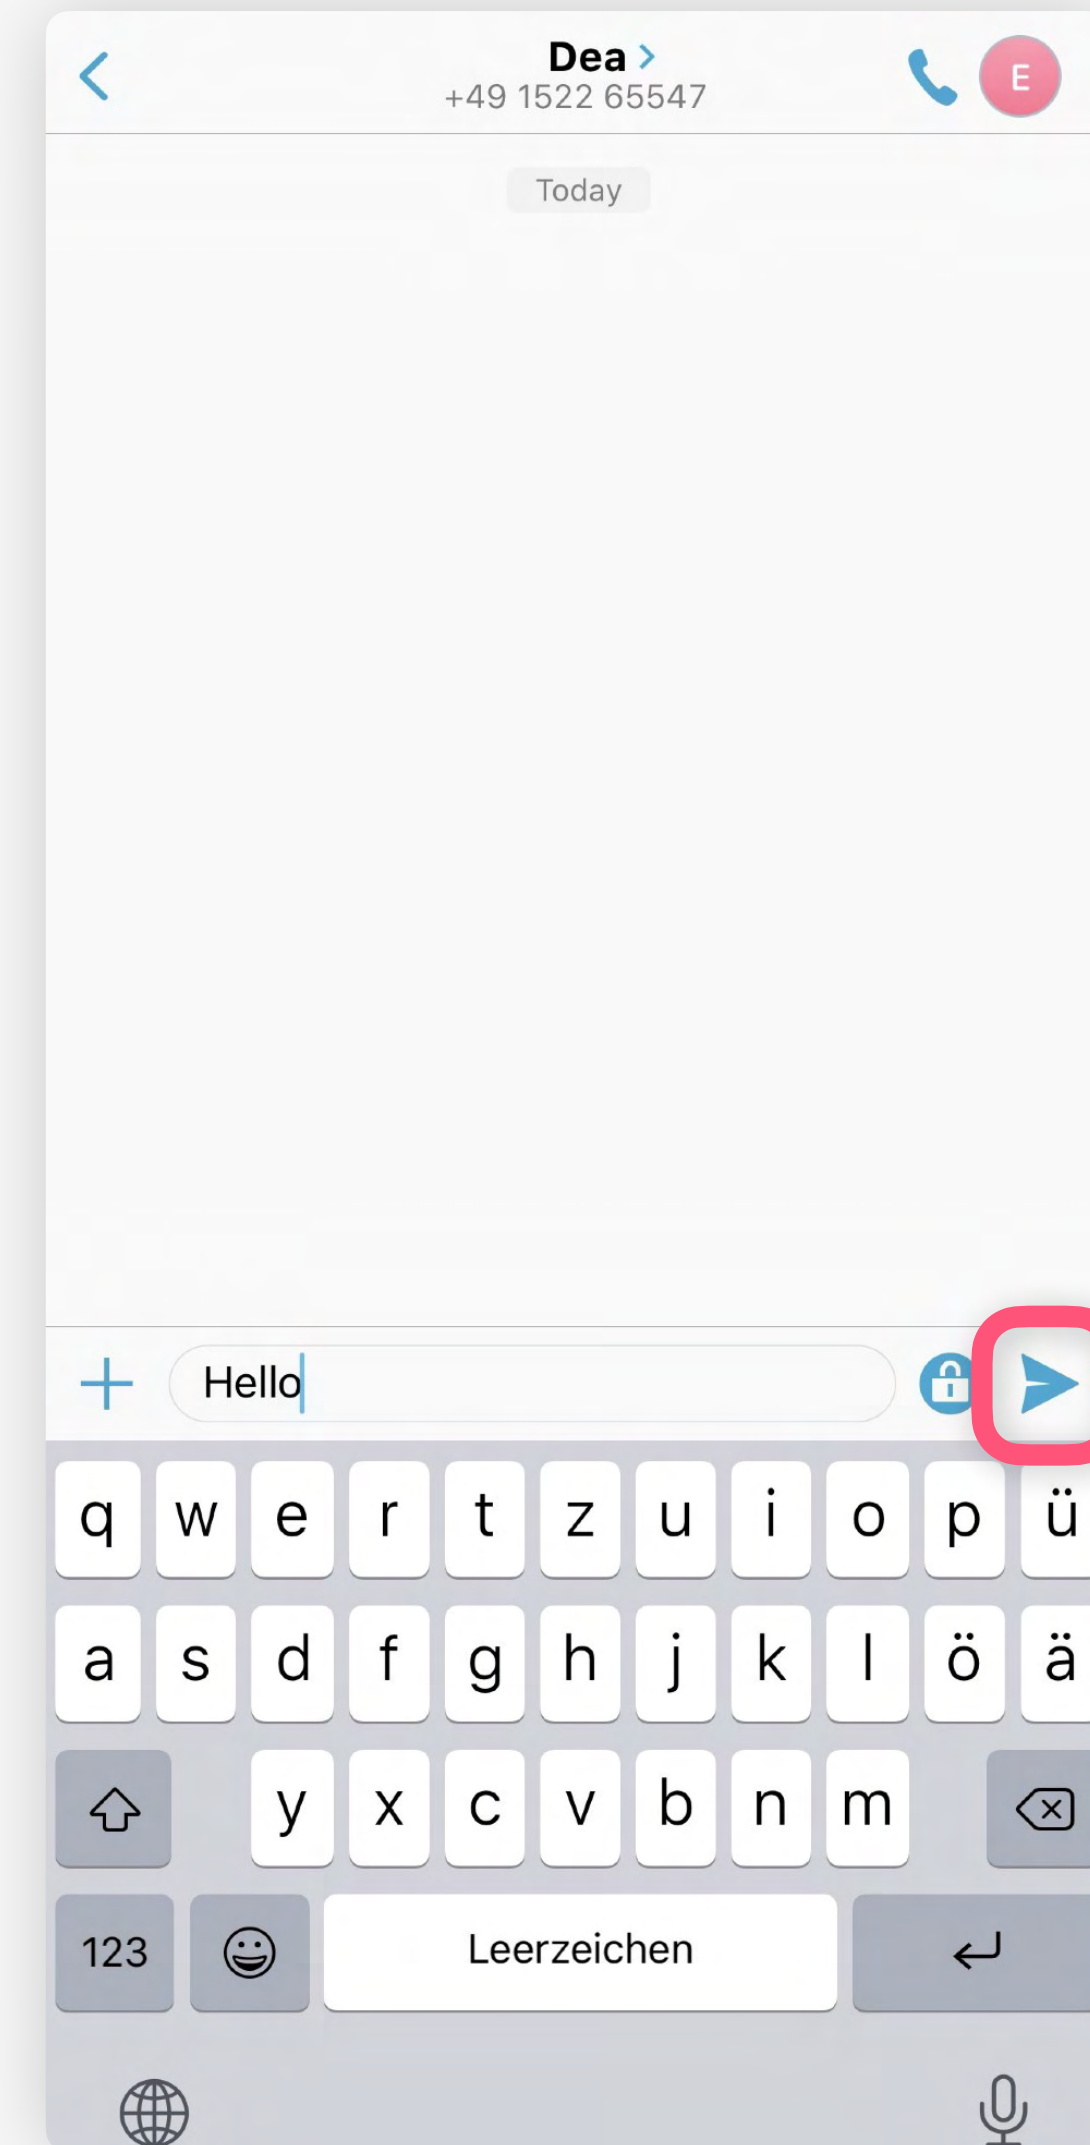

Start

Go to chats and press 
or  (on Android)

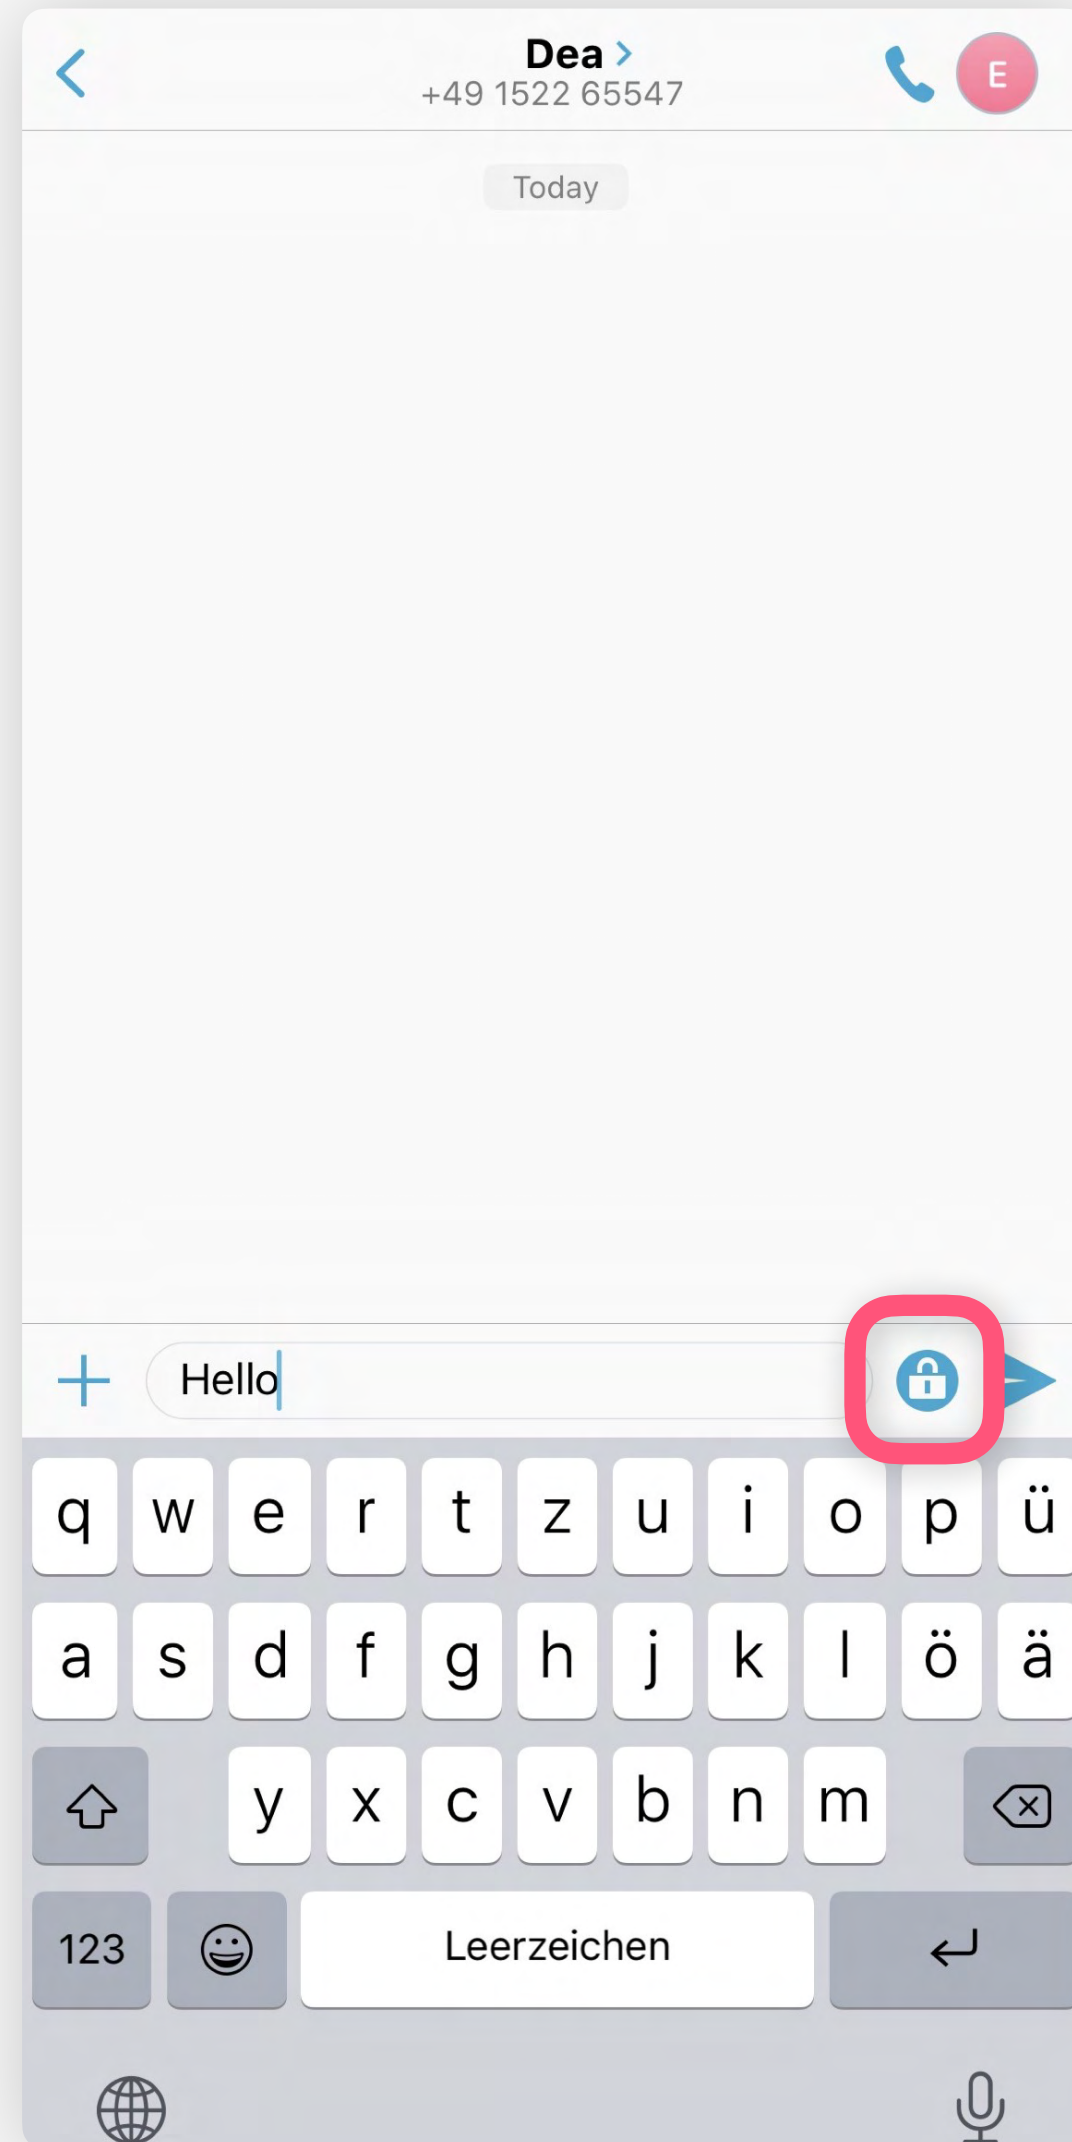

Select a contact

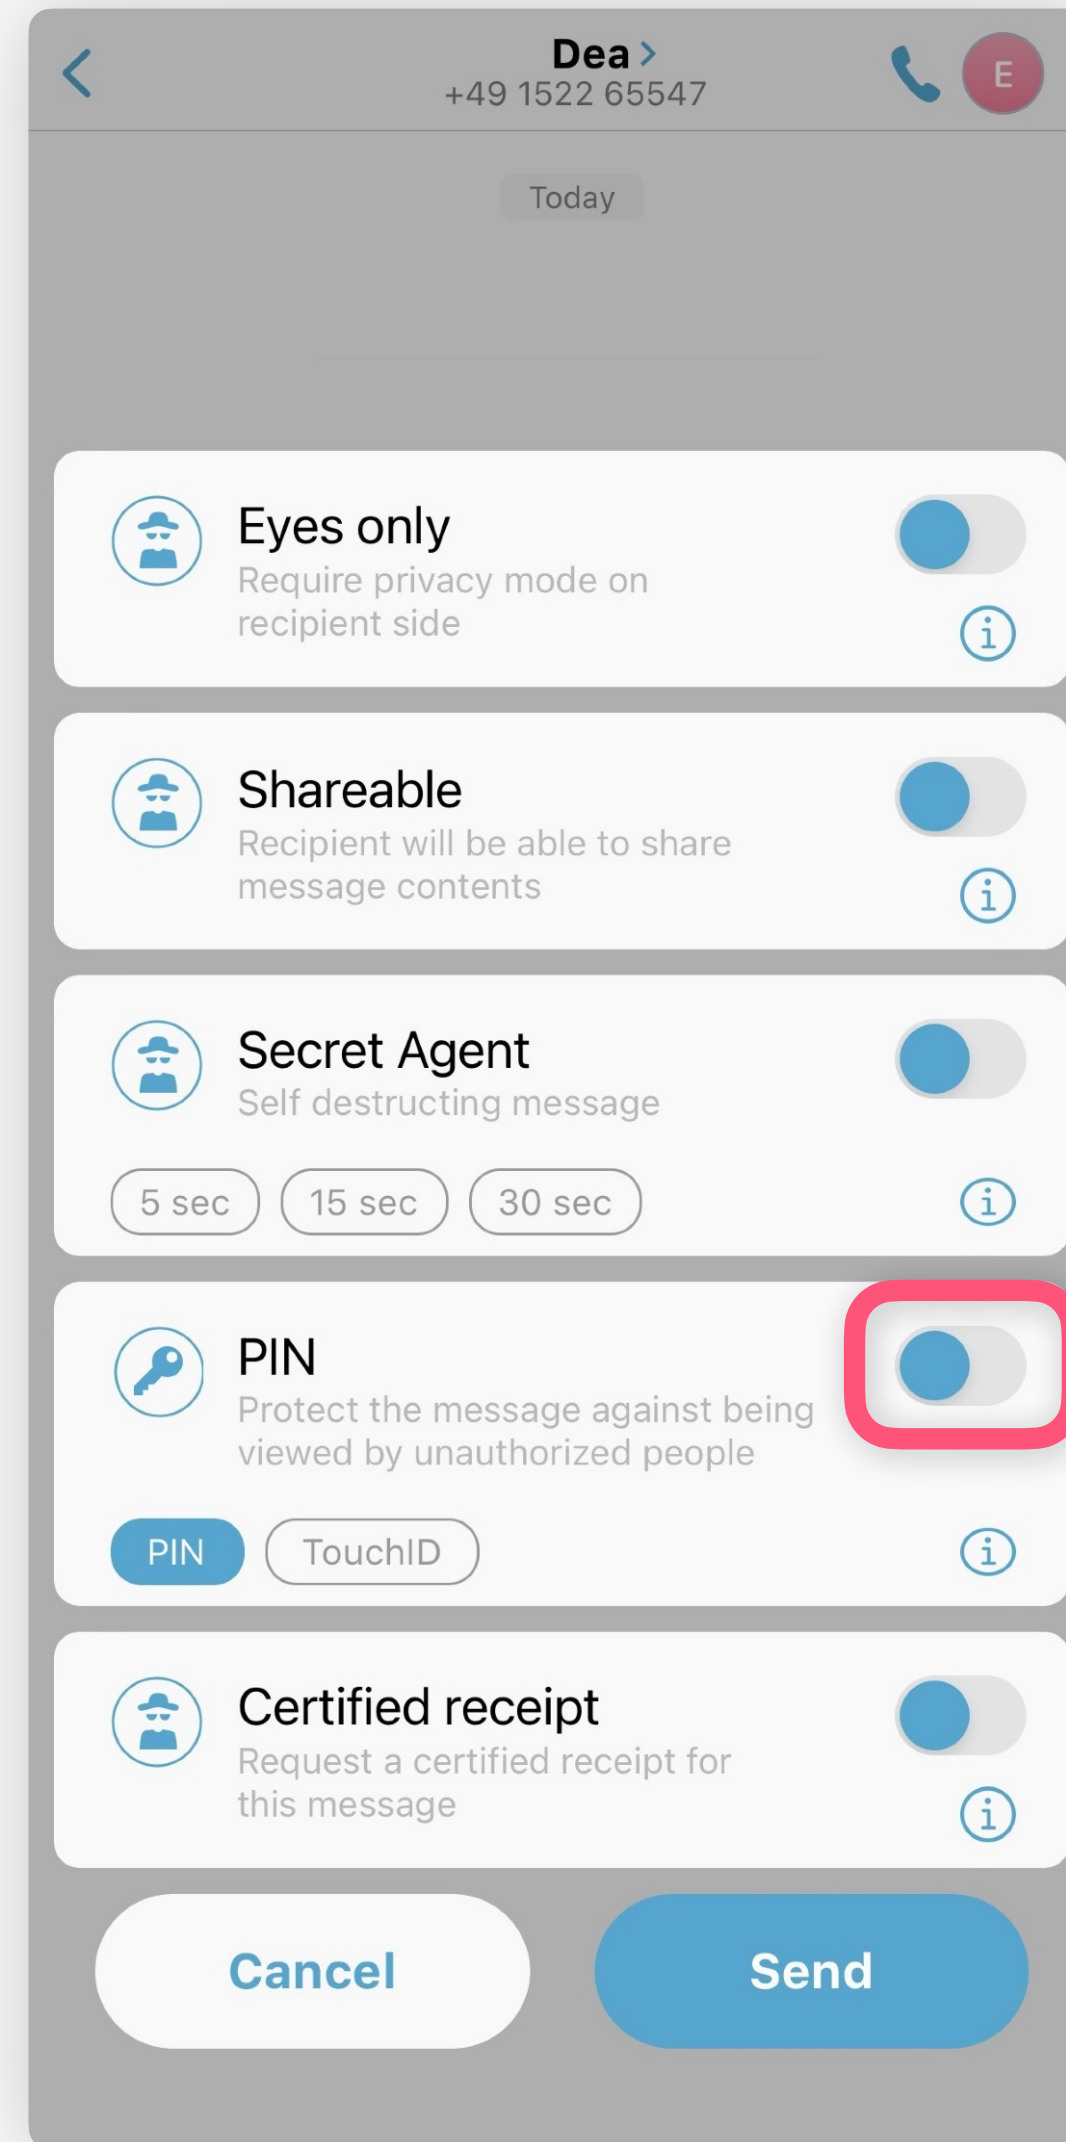

Type in your message and
press  to send the message

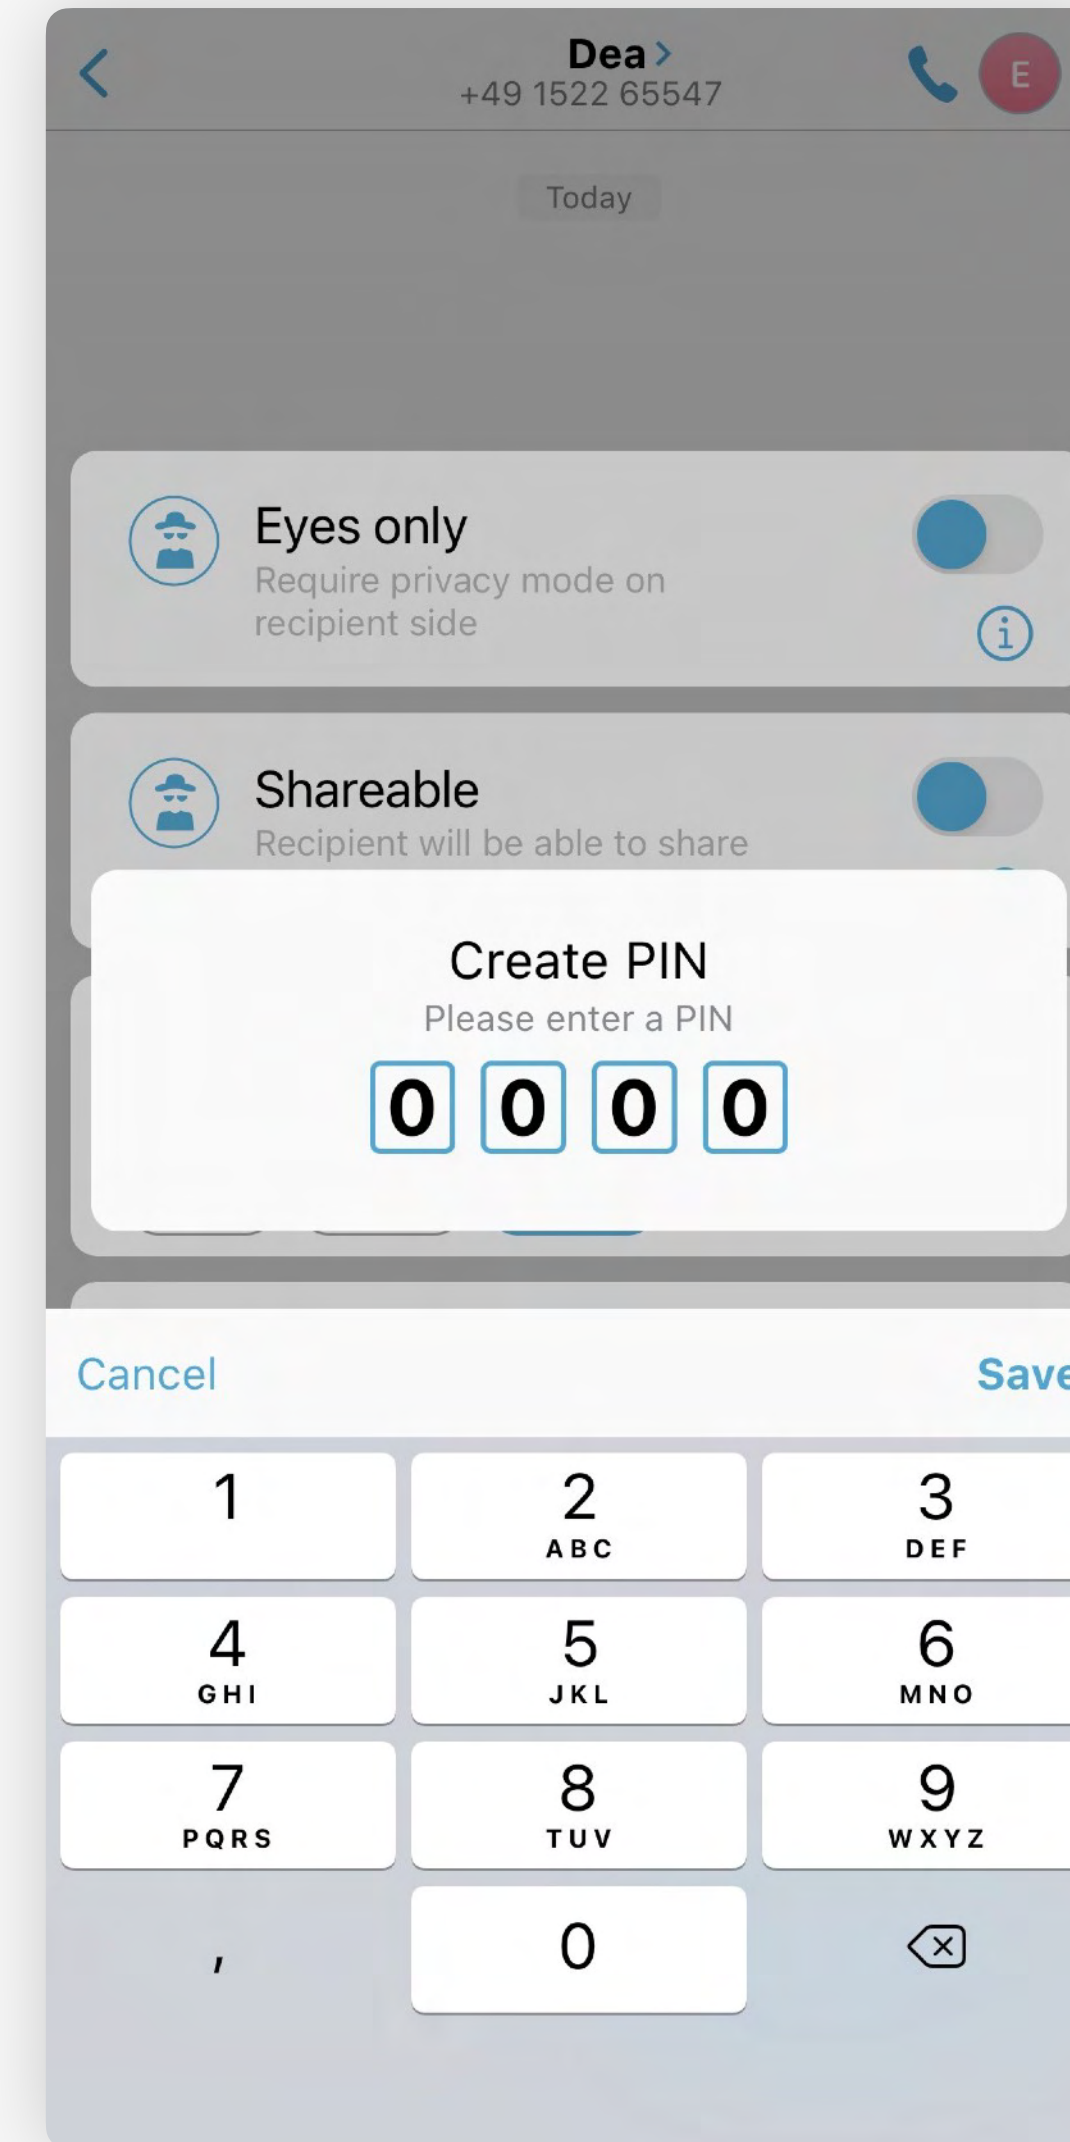

Next

To PIN-protect a chat message, press 

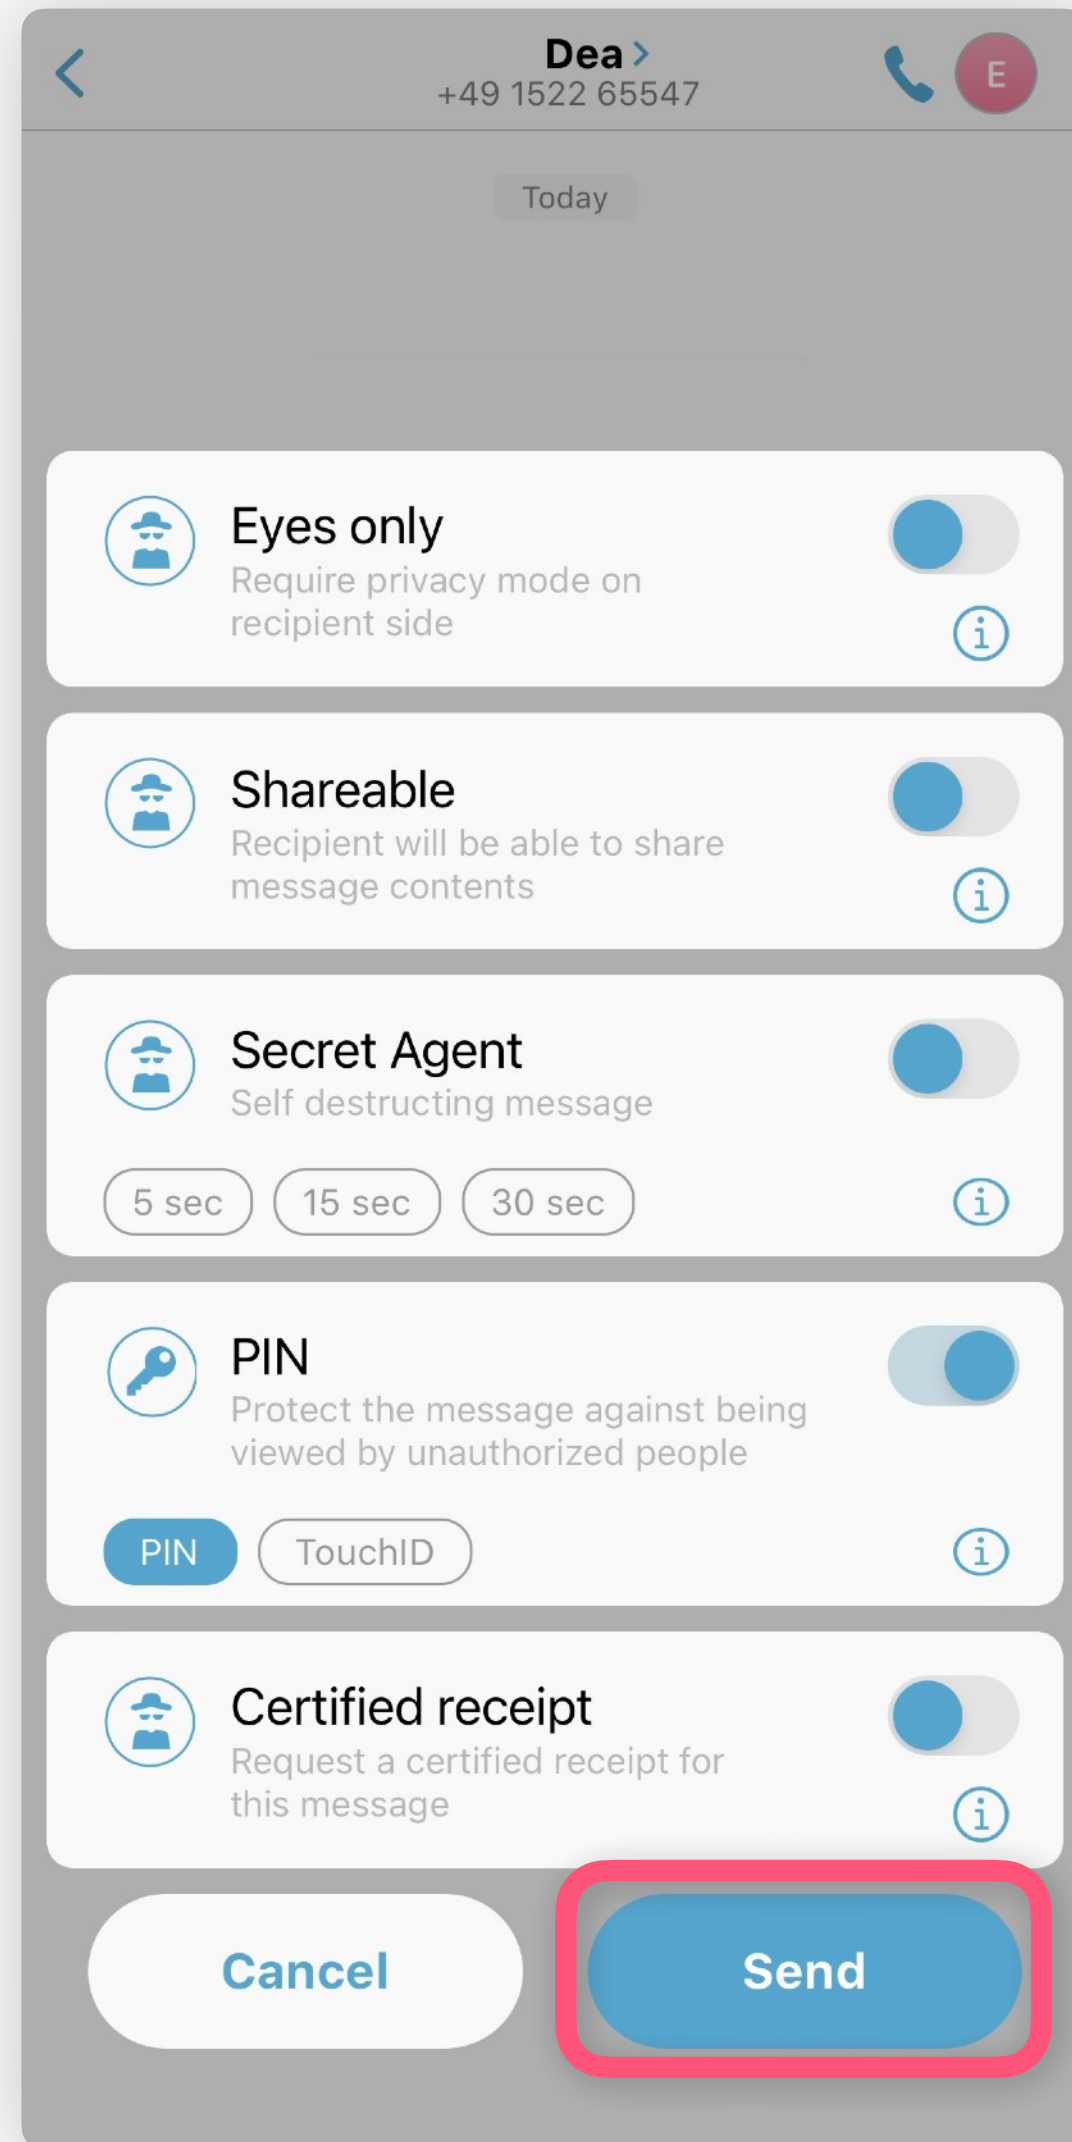

Activate the  toggle to create a PIN

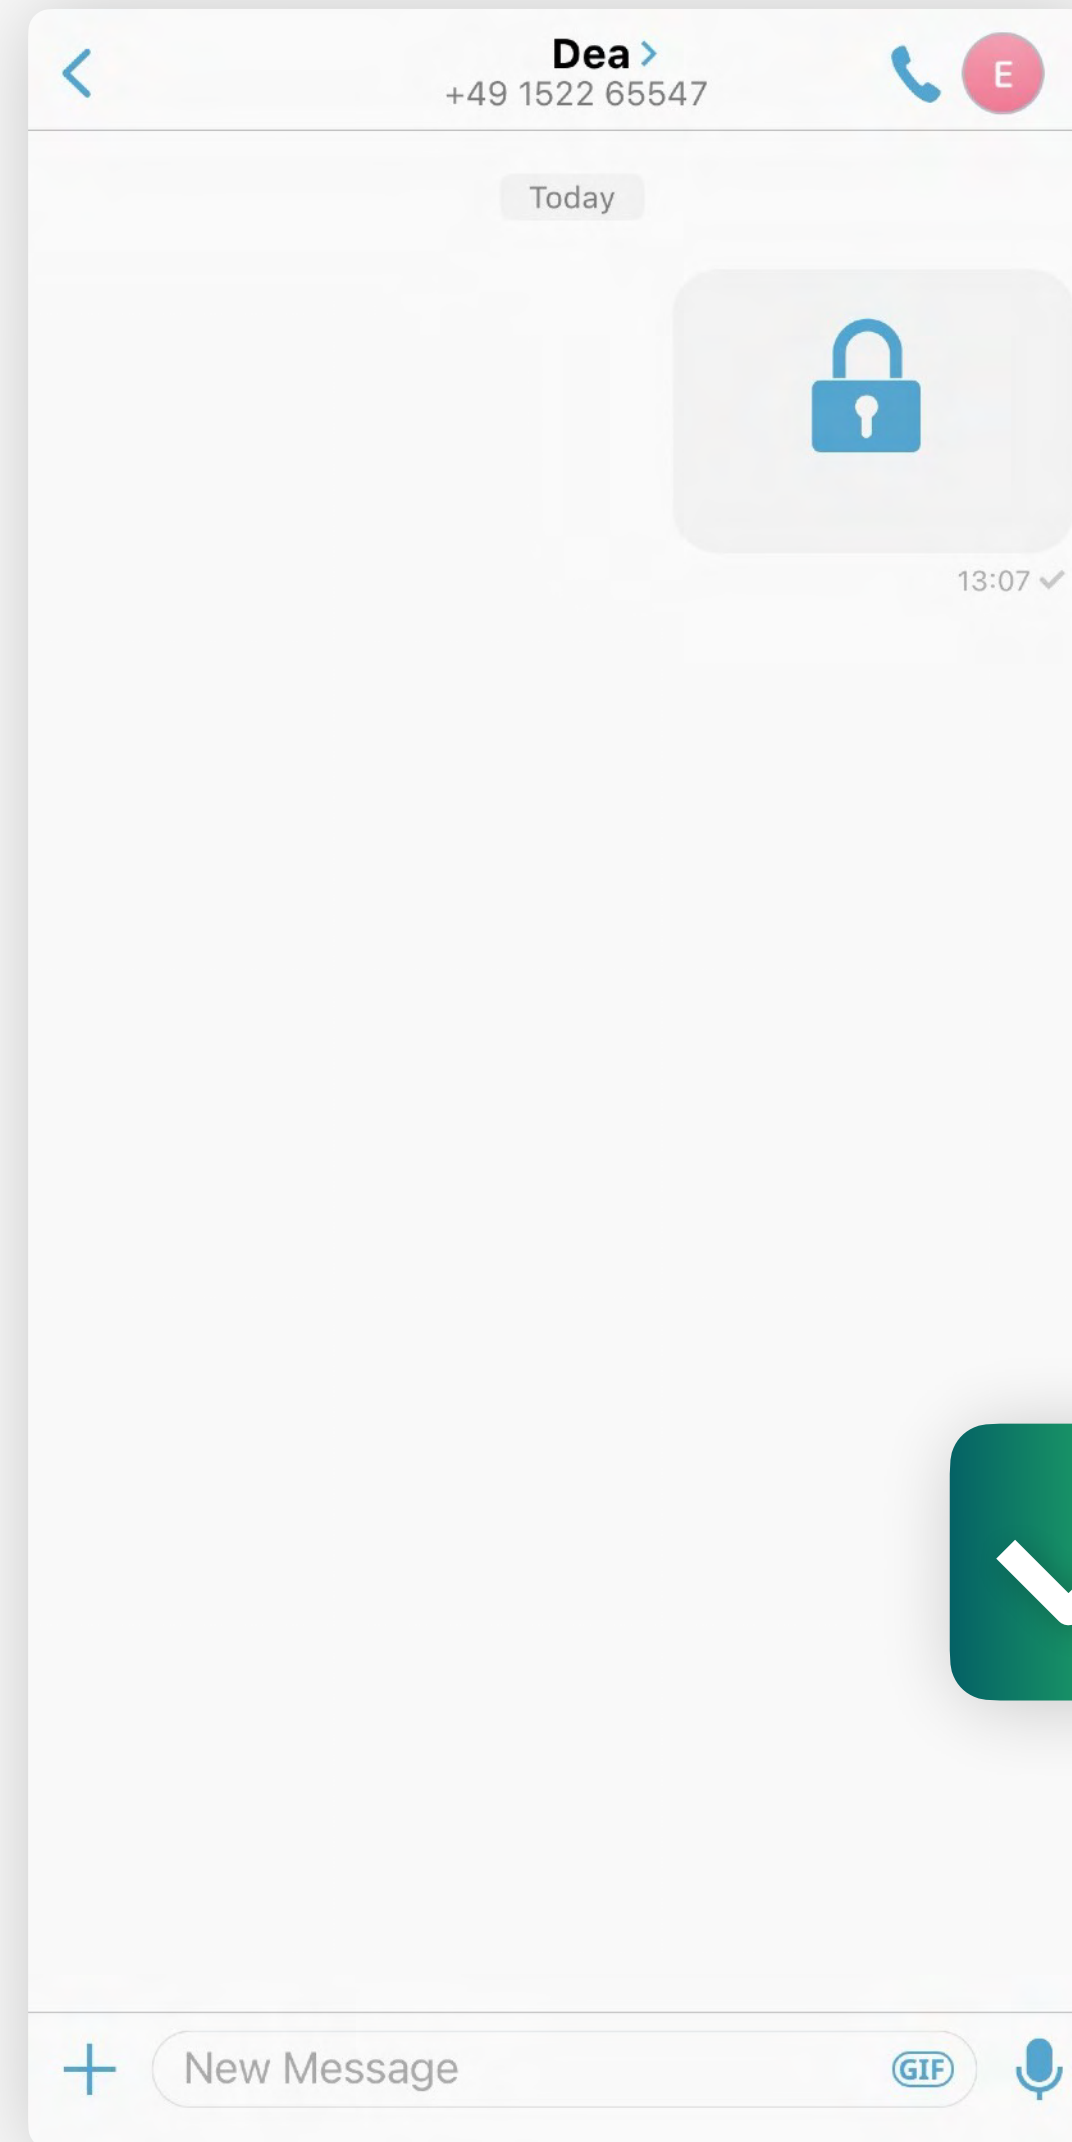

Choose and enter a PIN

Next

Press **Send**

Success!

This message is now protected by an additional layer.

Only people who know the PIN defined by you can view its content.
